

Attention Hitmen Families,

We are hoping to get a small project funded and completed early into the start of the season. Marc DeMarlie has come up with a landscape design that will make the front entrance of the complex look so much more appealing than the chain-link fencing that was the entrance to the complex before.

One of the parts of the entrance that people may be interested in is the addition of bricks. These will be sold for \$50 each and can include a player's name and number. The plan for this is that when we have enough bricks to complete a line they will be put in. We will not do them all at once because it will not look right until we have the complete line.

If you are interested in ordering a brick we will need payment and player information before we will have a brick created for you. We will be unable to honor brick requests until payment has been received. There will be a sign-up sheet at trivia so if you are interested you can sign up then. If you would like a brick but you are unable to come to trivia, there will be an order form emailed out soon. Please use that order form.

The following pictures show what the completed bricks will look like, as well as a front and top view of what the entrance will look like once it is completed.
